Professional Summary

Computer Science undergraduate at IIIT Una with expertise in **backend development**, **microservices architecture**, and **real-time systems** using **Node.js**, **Express.js**, and **Socket.io**. Experienced in building **event-driven applications** with **RabbitMQ**, **BullMQ**, and **Redis**, and deploying **containerized services** with **Docker** and **AWS EC2**, backed by strong fundamentals in **Data Structures**, **Operating Systems**, **DBMS**, and **Computer Networks**.

Technical Skills

Programming Languages: C++, JavaScript, Python, SQL
Frontend: React.js, Vite, Axios, EJS, HTML, CSS
Backend: Node.js, Express.js, REST APIs, Socket.io, WebSockets, JWT, Passport.js, Nodemailer, Multer
Databases & ORMs: MongoDB, MySQL, Redis, Sequelize, Mongoose
Distributed Systems: Microservices, RabbitMQ, BullMQ, API Gateway, bcrypt, Joi
Cloud & DevOps: Docker, AWS (EC2, RDS), Render, Vercel, Git, GitHub, Postman
Core CS: DSA, OOP, OS, DBMS, Computer Networks, Compiler Design, AI

Education

Indian Institute of Information Technology, Una 2024 – 2028
B.Tech in Computer Science and Engineering ***CGPA: 8.32 (Current)***

CBSE Board 2023
Class XII ***92.6%***

CBSE Board 2021
Class X ***89%***

Projects

CodeForge – Real-Time Competitive Programming Platform Aug 2026
React, Node.js, Express.js, Socket.io, BullMQ, Redis, MongoDB, Docker Live Demo | GitHub

- Developed a competitive programming platform with **28+ REST APIs** and **7 WebSocket events** for problem-solving, real-time 1v1 battles, and timed programming contests.
- Built an asynchronous code execution pipeline using **BullMQ** and **Redis** to compile and run C++ code in sandboxed **Docker** containers with network isolation and memory/CPU limits.
- Implemented real-time matchmaking and live battle telemetry using **Socket.io** with **rating-based opponent matching (±200 ELO)** and automatic ELO rating updates.
- Designed scheduled contests with **ICPC-style penalty leaderboards** cached in **Redis** and automated rating recalculation via a background scheduler.

Airline Booking System (Microservices) Jul 2026
Node.js, Express.js, MySQL, Sequelize, JWT, RabbitMQ, AWS, Cron GitHub

- Architected a **4-service microservices ecosystem** for airline booking, separating authentication, flight management, booking, and notification responsibilities for independent scalability.
- Built and secured **20+ REST APIs** behind a centralized **API Gateway**, enabling service discovery, request routing, and unified client access.
- Implemented **RabbitMQ-based event-driven communication** to coordinate booking transactions, seat inventory updates, and asynchronous notification workflows across services.
- Deployed services on **AWS EC2** with independent deployments and horizontal scaling of backend components.
- Automated booking confirmations and flight reminders using **Cron Jobs** and **Nodemailer**, improving operational efficiency and customer communication.

RoamHaven – Full-Stack Vacation Rental & Spatial Discovery Platform Apr 2026
Node.js, Express.js, MongoDB, EJS, Mapbox, Cloudinary, Passport.js, Joi Live Demo | GitHub

- Architected a full-stack rental marketplace with **15 RESTful API routes** across Listings, Reviews, and Users modules using **MVC architecture**.
- Implemented **Passport.js** authentication with **MongoStore** sessions and **role-based authorization** middleware for ownership verification.
- Integrated **Mapbox Geocoding API** for location search and **Cloudinary** + **Multer** for image uploads; enforced data integrity with **Joi** validation and **Mongoose post-hooks** for cascading review deletion.

Leadership Experience

Force Coding Club, IIIT Una
Core Member & Technical and Research Head

- Organized **5+ coding events** and technical competitions attended by **250+ students**.
- Organized the national-level hackathon **Hack-The-Throne** with **300+ registrations** from **20+ colleges**.

Achievements

- Secured **1st Place** in **PixelForge**, a college-level **UI/UX** competition at IIIT Una.
- Solved **450+ Data Structures and Algorithms** problems on **LeetCode** (**300+ Medium**).
- Ranked in the **Top 2%** of **1.4 million+ aspirants** in **JEE Mains 2024**.
